

ACHIEVING RESOURCE EFFICIENCY

- Interested in learning more about Resource Efficiency?
- Keen to deliver cost savings to your company?
- Unsure of the help and support available to achieve this?

If you answered yes to any of the above, then the **15th May** is a date for your diary.

Achieving Resource Efficiency

15th May 2008

09.30 am – 15.30 pm

Haydock Park, Merseyside

An event to help you reduce your costs

Envirowise in partnership with Chemicals Northwest is offering a unique opportunity for companies to understand and learn about the tools and techniques involved in achieving resource efficiency. The presentations will be delivered by environmental specialists, and by North West companies who will give practical examples of how cost savings have been achieved. There will also be an opportunity to participate in interactive workshops covering the latest technologies (toolkits), available support organisations in North West, and managing effective water use and effluent treatment.

Who should attend?

The event is aimed at all businesses and companies within the chemical using sector, and will focus on helping you to identify, manage and achieve resource efficiency. It will be of particular use to process managers, environmental managers and officers, senior executives and engineers.

Why should I attend?

Following the good practice advice given at the event you will be able to identify and understand the support organisations available within the North West region, and how they can help you achieve resource efficiency.

Through a series of case studies from North West companies you will gain a practical insight into how to achieve cost savings through resource efficiency measures, and learn about some of the key challenges now being faced.

Envirowise – sustainable practices, sustainable profits. Envirowise is a Government-funded programme dedicated to putting the sustainable use of resources at the heart of business practice. www.envirowise.gov.uk

Chemicals Northwest – core to the sustainability of chemistry-using industries in the England's NW. Chemicals Northwest is a not for profit organisation funded by industry and the Northwest Regional Development Agency. www.chemicalsnorthwest.org.uk

Places are limited, so register now to ensure you don't miss out.

Agenda
